

THUTHUKANI BENEDICT NGUBANE

Frontend / Full-Stack Developer (React & React Native)

Umlazi, KwaZulu-Natal | ngubane.thuthu@gmail.com | +27 67 188 4585 | github.com/Myaluza

PROFESSIONAL SUMMARY

Self-taught developer transitioning from customer support leadership into frontend and full-stack development, with hands-on experience building and shipping React Native applications using TypeScript. Currently building PeakDrive, a React Native app for Durban ride-hailing drivers with a live NestJS backend and Supabase/PostGIS database, and a free community safety app used as a structured TypeScript learning project. Brings a track record of leading teams, managing stakeholders, and driving process improvement into a development practice, with strong self-direction, an active public learning presence, and a growing command of React, TypeScript, and backend fundamentals.

TECHNICAL SKILLS

- Languages & Core: JavaScript, TypeScript, HTML, CSS
- Frontend: React, React Native, Expo, Expo Router, Tailwind CSS
- Backend: NestJS, Node.js, REST API design
- Data: PostgreSQL, Supabase, PostGIS (geospatial queries)
- Tooling & Practices: Git & GitHub, feature-branch workflow, ESLint, EAS Build, environment-based config
- Integrations: Push notifications (Expo Notifications, FCM V1), AdMob, Google OAuth, third-party APIs (SerpAPI, Gemini)
- Testing (in progress): React Native Testing Library, Jest

PROJECTS

PeakDrive | Personal project — React Native, Expo, NestJS, Supabase

A mobile app for Durban ride-hailing drivers (Bolt, inDriver) that surfaces surge-demand zones on a map, based on upcoming local events.

- Built the full React Native / Expo Router frontend, including authentication, onboarding, and a voucher/membership system
- Designed and deployed a NestJS backend on Render with a Supabase (PostgreSQL + PostGIS) database for geospatial event and surge data
- Built an automated event-data pipeline using SerpAPI and Gemini for search grounding, geocoding, and deduplication, run on scheduled NestJS cron jobs
- Integrated push notifications (Expo Notifications + FCM V1) and AdMob monetisation (banner, interstitial, rewarded ads)
- Migrating the codebase from JavaScript to TypeScript as an ongoing quality and learning initiative

Panic Button Safety App | Personal project — React Native, Expo, TypeScript

A free personal-safety app for South Africans, built TypeScript-first as a structured learning exercise.

- Implemented an SOS button, shake-to-activate detection, emergency contact management, and GPS location sharing
- Used strict TypeScript throughout — typed component props, form state, and API data shapes from the start

PROFESSIONAL EXPERIENCE

Customer Service Team Leader | Capability BPO — Durban, KwaZulu-Natal

Dec 2024 – Present

- Led a team of consultants, fostering a motivational and productive environment through coaching and empowerment
- Conducted regular 1:1 check-ins, providing feedback and setting clear performance expectations
- Implemented support procedures and standards to improve efficiency and customer satisfaction
- Handled escalated customer complaints, ensuring swift resolution within SLA
- Monitored KPIs and compiled reports to inform operational improvements

Retentions Team Leader | Capability BPO — Durban, KwaZulu-Natal

Aug 2024 – Nov 2024

- Directed retention strategies to improve customer trust and reduce churn
- Supported consultants with escalations and provided mentorship to enhance performance
- Collaborated with stakeholders to align team goals with organizational objectives

Customer Service Team Leader | Capability BPO — Durban, KwaZulu-Natal

Dec 2022 – Jul 2024

- Oversaw daily operations, ensuring productivity and adherence to customer support standards
- Designed and monitored team goals aligned with KPIs
- Streamlined processes to eliminate inefficiencies and improve service delivery

Subject Matter Expert (SME) | Capability BPO — Durban, KwaZulu-Natal

Jun 2021 – Nov 2022

- Provided mentorship and real-time support to agents on system navigation and troubleshooting
- Facilitated onboarding and continuous learning initiatives for new and existing staff
- Conducted quality checks and escalated systemic issues to management

EDUCATION & CERTIFICATION

- Google IT Support Professional Certificate
- Matric (Grade 12) — Port Shepstone High School, KwaZulu-Natal — 2007–2011
